

KL-P3 D

P3 disposable respirator

Product description

An excellent P3 disposable respirator offering protection from fine dusts, mists & metal fume.

The moulded cup shape and lightweight design ensures a comfortable fit for the wearer. The exhalation valve adds comfort to the user by lowering CO2 and heat build up. The foam inner face seal also offers extra comfort for the user. The KL-P3 is part of our 'essential' respiratory range.

Key Features

- Adjustable nose clip ensures an excellent individual fit and secure positioning
- PP Foam inner face seal offering higher comfort
- Extra wide adjustable elastic straps ensure a secure fit
- Lightweight
- High performance filter material offers effective filtration with easy breathing
- Excellent fit over a wide range of face sizes
- Protection against toxic and very toxic dust, mist and fumes, together with oil/water based particles.
- Anti-Clogging (D): Masks that include D in their markings mean that they have passed the dolomite test. This means that they are able to resist clogging in very fine dust environments.

Certification

EN149:2001 + A1:2009

Applications

- In very fine dust environments
- Battery manufacturing
- Pharmaceuticals
- Construction
- Welding and soldering
- Chemical processing
- Ship building/repair
- Iron and Steel Foundries

Materials

Component	Material
Filter Outer Layer	Polyester
Second Layer	Dolomite filter
Third layer	Melt-Blown [Polypropylene]
Fourth Inner layer	Polyester
Head strap	Spandex & Nylon
Nose Clip	Aluminium with plastic coating
Inner face seal	Soft PP foam
Exhalation Valve	ABS

Packaging

10 pieces per inner box

Adjustable nose clip

Low profile valve

-Aids field of vision and reduces build-up of heat/moisture

Multi-layer filter medium

Full foam inner face seal

Continuous loop head strap
- Ensures easy fitting with four point adjustment.
