Waterproof Gloves

H2O

The H2O glove is designed with a double latex fully coated exterior and a durable 13-gauge nylon liner, making it an excellent choice for various tasks. Our innovative technology enhances the coating, providing exceptional grip and strength in dry and wet conditions.

One of the key advantages of the H2O glove is its 100% waterproof feature, which keeps your hands dry and comfortable even in challenging environments. Additionally, it balances comfort and grip with impressive flexibility, ensuring you can perform tasks effectively without compromising dexterity. The H2O glove is designed with a double latex fully coated exterior and a durable 13-gauge nylon liner, making it an excellent choice for various tasks. Our innovative technology enhances the coating, providing exceptional grip and strength in dry and wet conditions.

Le gant H2O est doté d'une double couche extérieure en latex et d'une doublure en nylon durable de jauge 13, ce qui en fait un excellent choix pour diverses tâches. Notre technologie innovante améliore le revêtement, offrant une adhérence et une résistance exceptionnelles par temps sec comme humide.

L'un des principaux avantages du gant H2O est son imperméabilité à 100 %, qui garde vos mains au sec et confortables, même dans les environnements difficiles. De plus, il allie confort et adhérence à une flexibilité exceptionnelle, vous permettant d'effectuer vos tâches efficacement sans compromettre votre dextérité.

El guante H2O está diseñado con un exterior con doble recubrimiento de látex y un forro de nailon resistente de galga 13, lo que lo convierte en una excelente opción para diversas tareas. Nuestra innovadora tecnología mejora el recubrimiento, proporcionando un agarre y una resistencia excepcionales tanto en condiciones secas como húmedas.

Una de las principales ventajas del guante H2O es su impermeabilidad al 100 %, que mantiene las manos secas y cómodas incluso en entornos difíciles. Además, combina comodidad y agarre con una gran flexibilidad, garantizando un desempeño eficaz sin comprometer la destreza.

Recommended for: ✓ Excellent for handling wet items or working outdoors. For example, working with cement on building sites or oil handling and general inspection jobs.

Tek 540

The TEK 540 is a high-quality glove designed for optimal performance. It features a triple nitrile coating on a 13-gauge knitted spandex base. Its Tsunooga™ high-performance polyethylene and mineral fibre liner enhances durability while providing exceptional cut resistance (ISO 13997 level D) and impressive flexibility, ensuring comfort and a refreshing feel on the skin.

Additionally, the TEK540 is entirely impermeable to industrial oils and liquids, making it an excellent choice for users working in demanding oily or humid environments. This glove is tailored for intensive use and offers reliable protection, promoting safety and efficiency in the workplace.

Le TEK 540 est un gant de haute qualité conçu pour des performances optimales. Il est doté d'une triple enduction nitrile sur une base en élasthanne tricoté jauge 13. Sa doublure Tsunooga™ en polyéthylène haute performance et fibres minérales améliore la durabilité tout en offrant une résistance exceptionnelle aux coupures (ISO 13997 niveau D) et une flexibilité impressionnante, garantissant confort et sensation de fraîcheur sur la peau.

De plus, le TEK 540 est totalement imperméable aux huiles et liquides industriels, ce qui en fait un excellent choix pour les utilisateurs travaillant dans des environnements huileux ou humides exigeants. Ce gant est conçu pour un usage intensif et offre une protection fiable, favorisant la sécurité et l'efficacité au travail.

El TEK 540 es un guante de alta calidad diseñado para un rendimiento óptimo. Cuenta con un triple recubrimiento de nitrilo sobre una base de spandex tejido de galga 13. Su forro, fabricado con fibra Tsunooga™, es una mezcla de polietileno y fibra mineral de alto rendimiento, que no solo aumenta la durabilidad, pero también proporciona una excepcional resistencia al corte (ISO 13997 nivel D) y una gran flexibilidad, garantizando comodidad y una sensación refrescante en la piel.

Además, el TEK540 es totalmente impermeable a aceites y líquidos industriales, lo que lo convierte en una excelente opción para usuarios que trabajan en entornos exigentes con aceite o humedad. Este guante está diseñado para uso intensivo y ofrece una protección fiable, promoviendo la seguridad y la eficiencia en el lugar de trabajo.

Recommended for: ✓ When handling greasy or wet objects and Manufacturing.

DEL 728

The DEL 728 is a fully triple-coated foam nitrile gauntlet with an E-cut-resistant level. It is a 15-gauge product made with spandex and HPPE cut-resistant fibres manufactured by TOYOBO in Japan.

A dark, sandy nitrile layer on the palm provides a solid grip when handling items.

These gloves are ideal for workers who work with sharp metals, blades, plastics, glass, and similar materials. They also offer protection against liquids, grease, and oil.

DEL 728 gloves are available in five sizes: S, M, L, XL, and XXL.

F Le DEL 728 est un gant en mousse de nitrile triple couche, résistant aux coupures de niveau E. Ce produit de calibre 15 est fabriqué en élasthanne et en fibres HPPE résistantes aux coupures par TOYOBO au Japon.

Une couche de nitrile foncé et sable sur la paume assure une bonne préhension lors de la manipulation d'objets.

Ces gants sont parfaits pour les travailleurs manipulant des métaux tranchants, des lames, du plastique, du verre et des matériaux similaires. Ils offrent également une protection contre les liquides, la graisse et l'huile.

Les gants DEL 728 sont disponibles en cinq tailles : S, M, L, XL et XXL.

E El DEL 728 es un guantelete de espuma de nitrilo con triple recubrimiento y un nivel de resistencia al corte E. Es un producto de galga 15 fabricado con elastano y fibras resistentes al corte HPPE, fabricado por TOYOBO en Japón.

Una capa de nitrilo oscuro y arenoso en la palma proporciona un agarre firme al manipular objetos.

Estos guantes son ideales para quienes trabajan con metales afilados, cuchillas, plásticos, vidrio y materiales similares. También ofrecen protección contra líquidos, grasa y aceite.

Los guantes DEL 728 están disponibles en cinco tallas: S, M, L, XL y XXL.

Cut Resistant Gloves

Tek 549-8

The TEK 549-8 gloves are similar to the TEK 549-1 gloves, with the primary differences being the yarn colour and the colour of the polyurethane coating. The TEK 549-8 gloves are made from grey Tsunooga cut-resistant fibre and feature a black polyurethane coating on the palm.

Crafted entirely from 100% Tsunooga™ cut-resistant yarn, this glove is free from fibreglass, ensuring a safer and more durable experience. Its innovative high-performance polyethylene and mineral fibre liner enhances longevity while delivering exceptional cut resistance, making it a reliable choice for any task.

Explicitly designed for dry environments, the TEK 549-8 offers a snug, comfortable fit that promotes agility and a firm grip. Additionally, its ventilated back ensures that your hands remain cool and dry, even during the most demanding work. Choose the TEK 549-8 to elevate your safety and performance to the next level.

Los guantes TEK 549-8 son similares a los TEK 549-1, con las principales diferencias en el color del hilo y del revestimiento de poliuretano. Los guantes TEK 549-8 están fabricados con fibra resistente al corte Tsunooga gris y cuentan con un revestimiento de poliuretano negro en la palma.

Fabricado íntegramente con hilo 100 % resistente a cortes Tsunooga™, este guante no contiene fibra de vidrio, lo que garantiza una experiencia más segura y duradera. Su innovador forro de polietileno de alto rendimiento y fibra mineral aumenta la durabilidad a la vez que ofrece una resistencia excepcional a los cortes, lo que lo convierte en una opción fiable para cualquier tarea.

Diseñado específicamente para entornos secos, el TEK 549-8 ofrece un ajuste cómodo y ceñido que favorece la agilidad y un agarre firme. Además, su dorso ventilado garantiza que las manos se mantengan frescas y secas, incluso en los trabajos más exigentes. Elija el TEK 549-8 para llevar su seguridad y rendimiento al siguiente nivel.

Recommended for: ✓ Fine and delicate manipulations and handling small, sharp objects in the manufacturing process.

Cut level B Gloves

Les gants TEK 549-8 sont similaires aux gants TEK 549-1, les principales différences étant la couleur du fil et celle du revêtement en polyuréthane. Les gants TEK 549-8 sont fabriqués en fibre grise résistante aux coupures Tsunooga et présentent un revêtement en polyuréthane noir sur la paume.

Fabriqué entièrement en fil Tsunooga™ résistant aux coupures, ce gant est exempt de fibre de verre, garantissant une utilisation plus sûre et plus durable. Sa doublure innovante en polyéthylène haute performance et en fibres minérales améliore la longévité tout en offrant une résistance exceptionnelle aux coupures, ce qui en fait un choix fiable pour toutes les tâches.

Spécifiquement conçu pour les environnements secs, le TEK 549-8 offre un ajustement confortable et ajusté qui favorise l'agilité et une prise ferme. De plus, son dos ventilé garantit que vos mains restent fraîches et sèches, même lors des travaux les plus exigeants. Choisissez le TEK 549-8 pour améliorer votre sécurité et vos performances.

The "TEK 545™" with a 21 gauge liner glove boasts exceptional cut resistance, making it a top-tier choice for industrial applications. Its advanced design ensures not only durability but also superior grip and safety, positioning it as the ultimate solution for all your protective needs in challenging work conditions.

■ Le gant « TEK 545™ » avec doublure jauge 21 offre une résistance exceptionnelle aux coupures, ce qui en fait un choix de premier ordre pour les applications industrielles. Sa conception avancée garantit non seulement durabilité, mais aussi une adhérence et une sécurité supérieures, ce qui en fait la solution idéale pour tous vos besoins de protection dans des conditions de travail difficiles.

■ El guante "TEK 545™" con forro de galga 21 ofrece una excepcional resistencia al corte, lo que lo convierte en una opción de primera clase para aplicaciones industriales. Su diseño avanzado garantiza durabilidad, además de un agarre y seguridad superiores, lo que lo convierte en la solución definitiva para todas sus necesidades de protección en condiciones de trabajo exigentes.

Cut Resistant Sleeves

View our full **General Use** range at microlincooper.co.uk

CUT RESISTANT SLEEVES

Premier Cuff

Introducing PRIMA CUFF sleeves, expertly crafted through an innovative process that blends mixed fibres for unparalleled dexterity and reduced elbow fatigue. Experience exceptional comfort and freedom of movement, making these sleeves the perfect choice for demanding tasks.

Our PRIMA Cuff boasts a sleek grey, breathable woven design that excels in both performance and durability, offering superior resistance to abrasion and cutting. Lightweight and washable, these sleeves ensure lasting protection while maintaining ease of use. With their remarkable cut protection properties, they are an indispensable asset for professionals working in high-risk industrial environments.

Available in 35 cm and 45 cm lengths, PRIMA CUFF sleeves are the perfect solution for safeguarding your arms without compromising on comfort or style. Enhance your workplace safety with PRIMA CUFF, your trusted partner in protective gear

F Découvrez les manchettes PRIMA CUFF, fabriquées avec soin grâce à un procédé innovant combinant des fibres mixtes pour une dextérité inégalée et une réduction de la fatigue du coude. Bénéficiez d'un confort et d'une liberté de mouvement exceptionnels, ce qui en fait le choix idéal pour les tâches exigeantes.

Nos manchettes PRIMA CUFF arborent un design tissé gris élégant et respirant, alliant performance et durabilité, offrant une résistance supérieure à l'abrasion et aux coupures. Légères et lavables, ces manchettes assurent une protection durable tout en restant faciles d'utilisation. Grâce à leurs remarquables propriétés anti-coupures, elles constituent un atout indispensable pour les professionnels travaillant dans des environnements industriels à haut risque.

Disponibles en longueurs de 35 cm et 45 cm, les manchettes PRIMA CUFF sont la solution idéale pour protéger vos bras sans compromettre le confort ni le style. Améliorez votre sécurité au travail avec PRIMA CUFF, votre partenaire de confiance en matière d'équipements de protection.

E Presentamos las mangas PRIMA CUFF, confeccionadas por expertos mediante un innovador proceso que combina fibras mixtas para una destreza inigualable y una reducción de la fatiga del codo. Experimente una comodidad y una libertad de movimiento excepcionales, lo que las convierte en la opción perfecta para tareas exigentes.

Nuestras mangas PRIMA Cuff presentan un elegante diseño gris transpirable que destaca por su rendimiento y durabilidad, ofreciendo una resistencia superior a la abrasión y al corte. Ligeras y lavables, estas mangas garantizan una protección duradera a la vez que mantienen su facilidad de uso. Con sus extraordinarias propiedades de protección contra cortes, son un recurso indispensable para los profesionales que trabajan en entornos industriales de alto riesgo.

Disponibles en longitudes de 35 cm y 45 cm, las mangas PRIMA CUFF son la solución perfecta para proteger sus brazos sin sacrificar la comodidad ni el estilo. Mejore la seguridad en su lugar de trabajo con PRIMA CUFF, su aliado de confianza en equipos de protección.

Cardiff Sleeve

We proudly introduce our groundbreaking 45 cm sleeve, designed for ultimate comfort and protection. This sleeve has an elasticated cuff on one end and an adjustable Velcro strip on the other, ensuring a secure and customisable fit.

Crafted entirely from advanced Protecta fibre, this innovative material combines a grey-coloured multi-fibre thread with the cutting-edge Tsunooga® cut-resistant fibre produced by TOYOBO in Japan.

The unique construction of Protecta fibre encases the fibreglass strands, effectively preventing contact with the wearer's skin. This thoughtful design minimises the risk of allergic reactions and eliminates the itching that some users may experience with traditional materials.

With an impressive 14 times better-cut resistance than any existing para-aramid products, our sleeve represents the pinnacle of safety and comfort for those who demand the very best. Choose protection, choose comfort, and choose the future with our exceptional sleeve

Nous sommes fiers de vous présenter notre manchette révolutionnaire de 45 cm, conçue pour un confort et une protection ultimes. Elle est dotée d'un poignet élastique à une extrémité et d'une bande Velcro réglable à l'autre, garantissant un ajustement sûr et personnalisable.

Entièrement fabriquée à partir de la fibre Protecta avancée, ce matériau innovant associe un fil multifibre gris à la fibre de pointe résistante aux coupures Tsunooga®, produite par TOYOBO au Japon.

La construction unique de la fibre Protecta enveloppe les brins de fibre de verre, empêchant ainsi tout contact avec la peau. Cette conception réfléchée minimise les risques de réactions allergiques et élimine les démangeaisons que certains utilisateurs peuvent ressentir avec les matériaux traditionnels.

Avec une résistance aux coupures 14 fois supérieure à celle des produits para-aramides existants, notre manchette représente le summum de la sécurité et du confort pour ceux qui exigent le meilleur. Choisissez la protection, le confort et l'avenir avec notre manchette exceptionnelle

Recommended for: Automotive industry

Nos enorgullece presentar nuestra innovadora manga de 45 cm, diseñada para ofrecer la máxima comodidad y protección. Esta manga cuenta con un puño elástico en un extremo y una tira de velcro ajustable en el otro, lo que garantiza un ajuste seguro y personalizable.

Fabricada íntegramente con la avanzada fibra Protecta, este innovador material combina un hilo multifibra de color gris con la innovadora fibra resistente al corte Tsunooga®, producida por TOYOBO en Japón.

La exclusiva construcción de la fibra Protecta recubre los hilos de fibra de vidrio, evitando eficazmente el contacto con la piel del usuario. Este diseño inteligente minimiza el riesgo de reacciones alérgicas y elimina el picor que algunos usuarios pueden experimentar con los materiales tradicionales.

Con una impresionante resistencia al corte 14 veces superior a la de cualquier fibras conteniendo para-aramida o Kevlar, nuestra manga representa la cumbre de la seguridad y la comodidad para quienes exigen lo mejor. Elija protección, elija comodidad y elija el futuro con nuestra excepcional manga.

Arizona Sleeve

The Arizona sleeve is specifically designed for use in extremely high temperatures. It is made from fibreglass fabric, Twaron felt, and silicone fibres, providing superior protection against contact and convective heat.

This sleeve complies with the EN 407 standard for heat resistance, capable of withstanding temperatures up to 500°C for more than 15 seconds. In addition to its heat protection, it offers excellent cut and abrasion resistance while ensuring good dexterity, making it safe even in high-temperature environments.

The sleeves are available in a length of 55 cm and come in a single size.

NEW

La manchette Arizona est spécialement conçue pour une utilisation à des températures extrêmement élevées. Composée de fibre de verre, de feutre Twaron et de fibres de silicone, elle offre une protection supérieure contre la chaleur de contact et la chaleur convective.

Conforme à la norme EN 407 relative à la résistance à la chaleur, cette manchette résiste à des températures allant jusqu'à 500 °C pendant plus de 15 secondes. Outre sa protection thermique, elle offre une excellente résistance aux coupures et à l'abrasion, tout en garantissant une bonne dextérité, garantissant ainsi une sécurité optimale même dans des environnements à haute température.

Les manchettes sont disponibles en longueur de 55 cm et en taille unique.

El manguito Arizona está diseñada específicamente para su uso en temperaturas extremadamente altas. Está fabricada con tejido de fibra de vidrio, fieltro Twaron y fibras de silicona, lo que proporciona una protección superior contra el calor por contacto y convectivo.

Esta funda cumple con la norma EN 407 de resistencia al calor, capaz de soportar temperaturas de hasta 500 °C durante más de 15 segundos. Además de su protección térmica, ofrece una excelente resistencia al corte y a la abrasión, a la vez que garantiza una buena destreza, lo que la hace segura incluso en entornos de alta temperatura.

Las fundas están disponibles en una longitud de 55 cm y en talla única.

Puncture Resistant & Arc Flash Gloves

PUNCTURE RESISTANT & ARC FLASH GLOVES

Cotton canvas cuff
offering a comfortable,
secure fit.

Ripeur 2

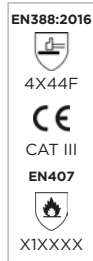

The Ripeur 2 glove is fully protected on the whole hand and front of the wrist. It is made with a heavy weight, knitted cut resistant fibre and stitched with Kevlar thread. The outer layer is leather which has been treated for water resistance.

🇫🇷 Ripeur 2 est résistant aux épines acérées et verre. Très souple et confortable à porter.

🇪🇸 Guante muy resistente a elementos, hidrófugo. Ideal contra para uso de recoger basura, vidio etc.

Recommended for: ✓ Handling in oily and greasy conditions. ✓ Can be resistant to punctures from certain syringes. ✓ Litter collection, outdoor work.

Liner	Dyneema/Inox fibres
Sizes Available	M-XXL
Bag/Case Qty	5 Pairs per bag/50 per case
Colour	Beige

Longer leather
cuff, providing
extra durability
and protection

RIPDEXG

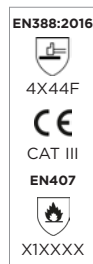

Anti-perforation leather glove
for razor wire.

🇫🇷 Gant en cuir pour fil de rasoir.

🇪🇸 Guante de cuero para alambre de púas.

Recommended for: ✓ This glove offers the highest levels of performance for optimum protection when handling razor wire and concertina wire.

Coating	Oil-proofed & water-proofed cow split leather
Liner	Polyamide fibres, Stainless steel fibres
Sizes Available	M, L, XL, XXL
Bag/Case Qty	Per Pair
Colour	Yellow

range at microlincooper.co.uk

Arc Flash Glove

Arc flash and flame-resistant gloves are used when performing maintenance work, de-energising electrical panels, and working on hot engines and machinery. Arc-flash gloves are flame-resistant, but not all flame-resistant gloves are arc-flash-rated.

These gloves are designed to offer protection against electrical shock, making them essential for individuals working in electrical environments. While rubber gloves provide some safety, they offer limited protection from heat and flames associated with an arc flash.

An arc flash is a significant event characterised by a burst of light and heat caused by an arc fault—sometimes known as an electrical flashover. This event occurs when there is an unintended connection through the air to the ground or another voltage phase within an electrical system.

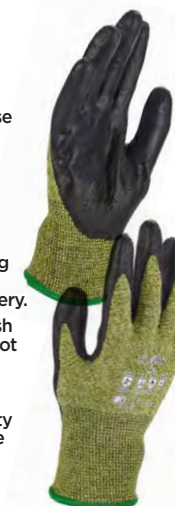

Several factors can lead to arc flashes, including unintentional contact between an energised conductor, a bus bar or wire, and another conductor or an earthed surface. Equipment failures may also contribute to these incidents.

The thermal energy generated during an arc flash can be catastrophic. Proper use of arc flash protective gear can significantly minimise the risk of severe burns and other life-threatening injuries associated with these incidents.

When an arc flash occurs, an electrical discharge travels through the air, releasing an intense burst of energy that can reach temperatures exceeding 19,000°C.

To enhance safety, it's crucial to wear arc flash-rated and flame-resistant gloves during maintenance work, de-energizing electrical panels, or handling hot engines and machinery.

It's essential to remember that while arc flash gloves are designed to be flame-resistant, not all flame-resistant gloves meet the specific standards needed for effective arc flash protection. By selecting the appropriate protective equipment, we can improve safety and reduce the likelihood of accidents in the workplace.

🇫🇷 Les gants résistants aux arcs électriques et aux flammes sont utilisés lors des travaux de maintenance, de mise hors tension des panneaux électriques et de travail sur des moteurs et machines chauds. Les gants résistants aux arcs électriques sont ignifuges, mais tous ne sont pas homologués pour ce type de gants.

Ces gants sont conçus pour offrir une protection contre les chocs électriques, ce qui les rend indispensables pour les personnes travaillant dans des environnements électriques. Si les gants en caoutchouc offrent une certaine sécurité, ils offrent une protection limitée contre la chaleur et les flammes associées à un arc électrique.

Un arc électrique est un événement important caractérisé par une explosion de lumière et de chaleur provoquée par un défaut d'arc électrique, parfois appelé contournement électrique. Cet événement se produit lorsqu'une connexion aérienne accidentelle à la terre ou à une autre phase de tension d'un système électrique est établie.

Plusieurs facteurs peuvent provoquer des arcs électriques, notamment le contact accidentel entre un conducteur, une barre omnibus ou un fil sous tension et un autre conducteur ou une surface mise à la terre. Les pannes d'équipement peuvent également contribuer à ces incidents.

L'énergie thermique générée lors d'un arc électrique peut être catastrophique. L'utilisation appropriée d'un équipement de protection contre les arcs électriques peut réduire considérablement le risque de brûlures graves et d'autres blessures potentiellement mortelles associées à ces incidents.

Lorsqu'un arc électrique se produit, une décharge électrique se propage dans l'air, libérant une énergie intense pouvant atteindre des températures supérieures à 19 000 °C.

Pour plus de sécurité, il est essentiel de porter des gants résistants aux arcs électriques et ignifuges lors des travaux de maintenance, de mise hors tension des panneaux électriques ou de manipulation de moteurs et de machines chauds.

Il est essentiel de garder à l'esprit que, bien que les gants anti-arcs électriques soient conçus pour être ignifuges, ils ne répondent pas tous aux normes spécifiques requises pour une protection efficace contre les arcs électriques. En choisissant un équipement de protection approprié, nous pouvons améliorer la sécurité et réduire le risque d'accidents sur le lieu de travail.

🇪🇸 Los guantes resistentes al arco eléctrico y a las llamas se utilizan al realizar trabajos de mantenimiento, desconectar paneles eléctricos y trabajar con motores y maquinaria calientes. Si bien los guantes resistentes al arco eléctrico son resistentes a las llamas, no todos son aptos para arco eléctrico.

Estos guantes están diseñados para ofrecer protección contra descargas eléctricas, lo que los hace esenciales para quienes trabajan en entornos eléctricos. Si bien los guantes de goma ofrecen cierta seguridad, ofrecen una protección limitada contra el calor y las llamas asociados a un arco eléctrico.

Un arco eléctrico es un evento significativo que se caracteriza por una ráfaga de luz y calor causada por una falla de arco, a veces conocida como descarga disruptiva eléctrica. Este evento ocurre cuando hay una conexión involuntaria a través del aire con la tierra u otra fase de tensión dentro de un sistema eléctrico.

Diversos factores pueden provocar arcos eléctricos, incluyendo el contacto involuntario entre un conductor energizado, una barra colectora o un cable, y otro conductor o una superficie conectada a tierra. Los fallos de los equipos también pueden contribuir a estos incidentes.

La energía térmica generada durante un arco eléctrico puede ser catastrófica. El uso adecuado del equipo de protección contra arco eléctrico puede minimizar significativamente el riesgo de quemaduras graves y otras lesiones potencialmente mortales asociadas con estos incidentes.

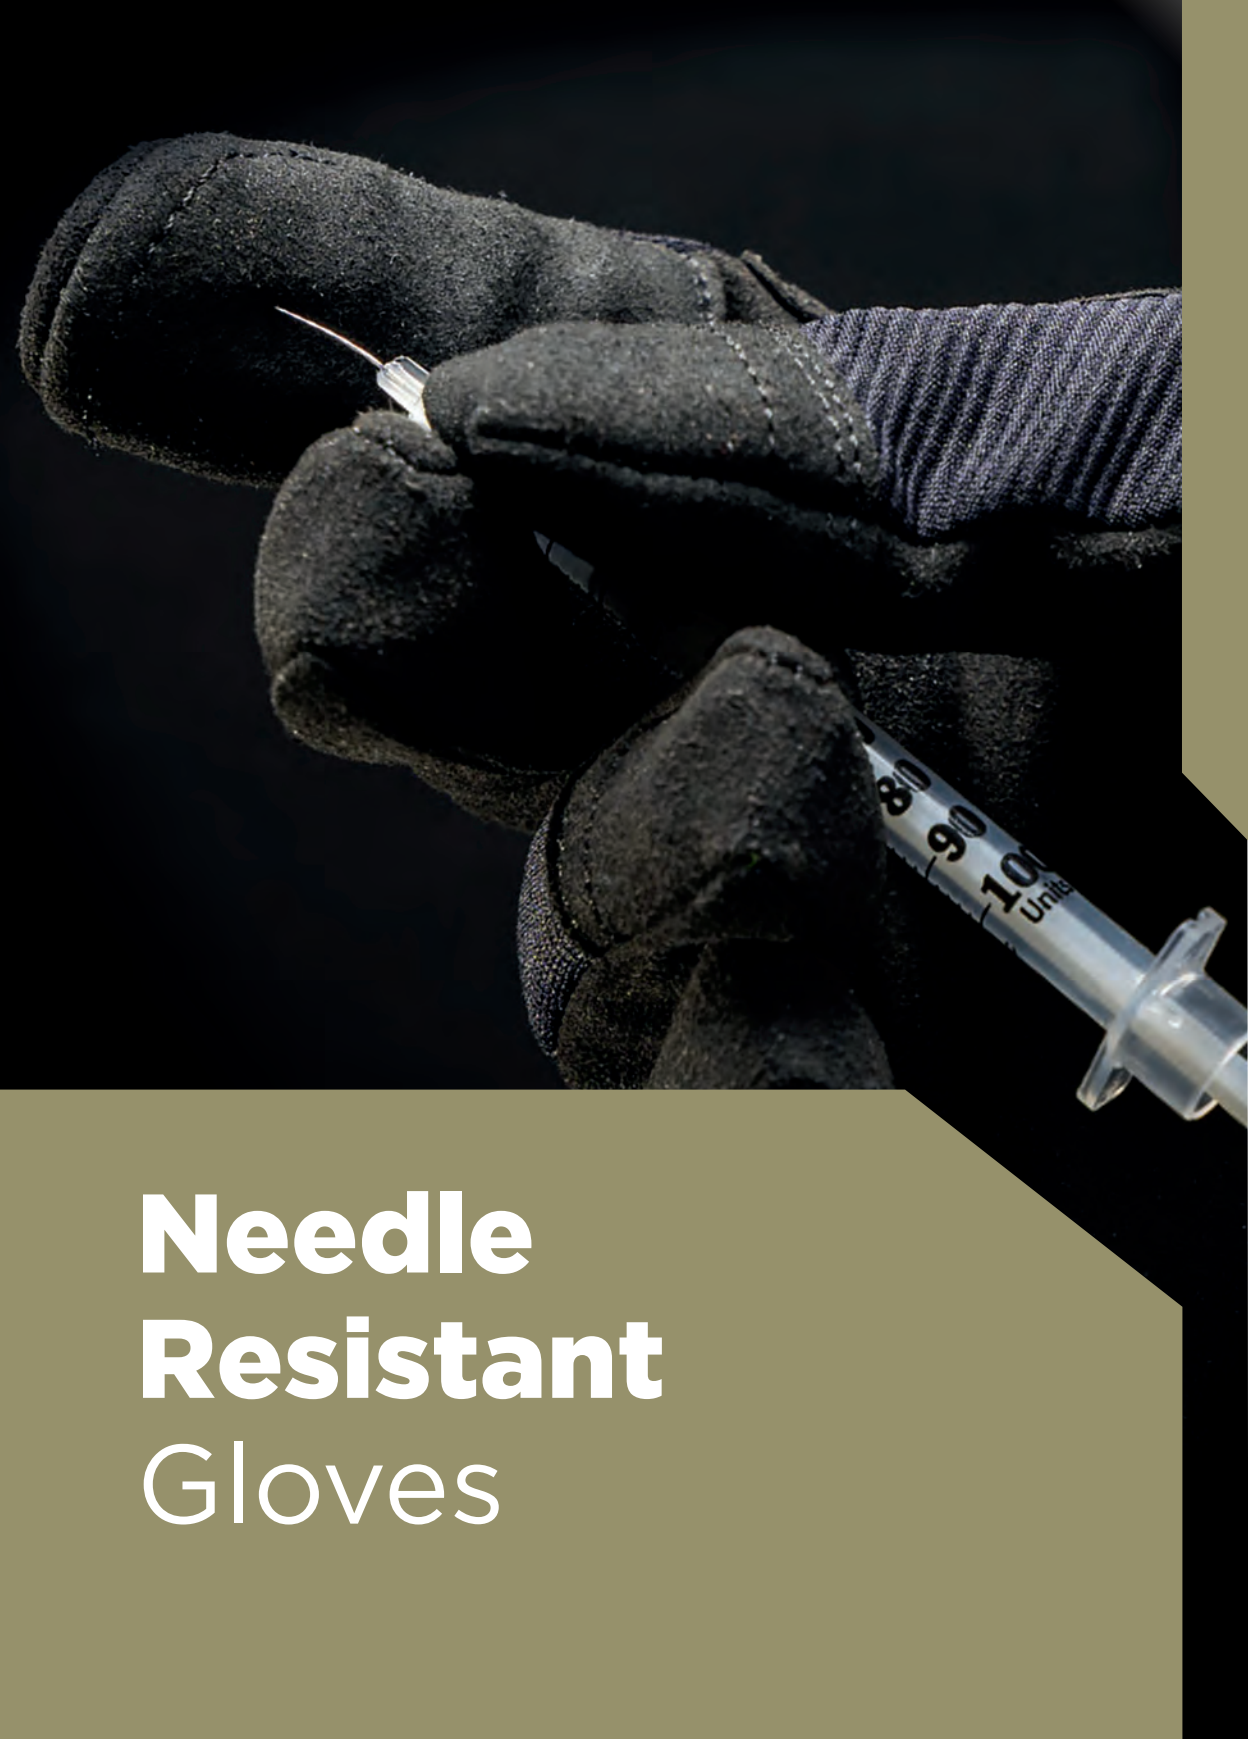

Cuando se produce un arco eléctrico, una descarga eléctrica se propaga por el aire, liberando una intensa descarga de energía que puede alcanzar temperaturas superiores a los 19 000 °C.

Para mejorar la seguridad, es fundamental usar guantes resistentes al arco eléctrico y a las llamas durante las tareas de mantenimiento, la desconexión de cuadros eléctricos o la manipulación de motores y maquinaria calientes.

Es fundamental recordar que, si bien los guantes resistentes al arco eléctrico están diseñados para ser resistentes a las llamas, no todos cumplen con los estándares específicos necesarios para una protección eficaz contra el arco eléctrico. Al seleccionar el equipo de protección adecuado, podemos mejorar la seguridad y reducir la probabilidad de accidentes en el lugar de trabajo.

Coating	Neoprene
Gauge	13
Sizes Available	Small - XXL

NEEDLE RESISTANT GLOVES

Anti - Needle 5

The ANTINEEDLE-5 Needle Resistant Glove is a heavy-duty fully coated safety glove that provides complete palm protection. These gloves guard against punctures, needles, and blade cut hazards. The protective areas include the fingers, fingertips, and palms, which have been tested to ensure high safety levels. The gloves are utilised across various industries for a wide range of tasks.

Le gant résistant aux aiguilles
ANTINEEDLE-5 est gant de sécurité entièrement enduit robuste conçu pour une protection intégrale de la paume. Il protège contre les perforations, les aiguilles et les coupures par lame. Les zones de protection, notamment les doigts, le bout des doigts et la paume, ont été testées pour garantir un niveau de sécurité élevé. Ces gants sont utilisés dans divers secteurs d'activité pour une grande variété de tâches.

El guante resistente a agujas
ANTINEEDLE-5 es guante de seguridad totalmente recubierto de alta resistencia diseñado para brindar protección completa en la palma. Estos guantes protegen contra pinchazos, agujas y cortes con cuchillas. Las zonas de protección incluyen los dedos, las yemas de los dedos y las palmas, las cuales han sido probadas para garantizar altos niveles de seguridad. Estos guantes se utilizan en diversas industrias para una amplia gama de tareas.

Recommended for: ✓ Security inspection, hospitals, council workers, agricultural and gardening, waste disposal, construction sites, recycling areas etc.

Coating	Crinkled latex coating
Liner	Polyester lining, stainless steel fibres and cotton
Sizes Available	M-XL
Bag/Case Qty	Packed per pair

ANTI-STATIC GLOVES

DEL 300 Uncoated antistatic glove

When precision meets protection, outstanding results are achieved. The DEL 300 antistatic uncoated glove, designed with carbon fibres, enhances your experience in environments where electrostatic discharge (ESD) can potentially damage sensitive equipment and components.

This glove provides essential benefits, including:

- ✓ Robust protection against ESD and - Increased tactile sensitivity for detailed tasks.
- ✓ Ensure compliance with industry safety and performance standards.

Key Features

- ✓ Carbon Fiber Technology: Delivers remarkable antistatic properties that protect delicate electronic equipment.
- ✓ Uncoated Design: Ensures excellent dexterity and a secure grip for precise handling.
- ✓ Breathable Comfort: Constructed with lightweight materials, keeping you comfortable during extended use.
- ✓ Durability and Longevity: Engineered to endure repeated use without sacrificing performance.

Quand précision rime avec protection, des résultats exceptionnels sont obtenus. Le gant antistatique sans revêtement DEL 300, conçu avec des fibres de carbone avancées, améliore votre expérience dans les environnements où les décharges électrostatiques (DES) peuvent endommager les équipements et composants sensibles.

Ce gant offre des avantages essentiels, notamment :

- ✓ Protection robuste contre les DES.
- ✓ Sensibilité tactile accrue pour les tâches de précision.
- ✓ Conformité aux normes de sécurité et de performance de l'industrie.

Caractéristiques principales

- ✓ Technologie fibre de carbone: Propriétés antistatiques remarquables qui protègent efficacement les composants électroniques fragiles.
- ✓ Conception sans revêtement: Excellente dextérité et prise en main sûre pour une manipulation précise.
- ✓ Confort respirant: Fabriqué avec des matériaux légers, il assure votre confort pendant une utilisation prolongée.
- ✓ Durabilité et longévité: Conçu pour résister à une utilisation répétée sans compromettre les performances

Recommended for: ✓ Micro-processors,
✓ Delicate and precise operations,
✓ Electronics and ✓ Photographic printing.

Cuando la precisión se une a la protección, se logran resultados excepcionales. El guante antiestático sin recubrimiento DEL 300, diseñado con fibras de carbono avanzadas, mejora su experiencia en entornos donde las descargas electrostáticas (ESD) pueden dañar equipos y componentes sensibles.

Este guante ofrece ventajas esenciales, entre ellas:

- ✓ Protección robusta contra ESD.
- ✓ Mayor sensibilidad táctil para tareas que requieren precisión.
- ✓ Garantía de cumplimiento con las normas de seguridad y rendimiento de la industria.

Características clave

- ✓ Tecnología de fibra de carbono**: Ofrece extraordinarias propiedades antiestáticas que protegen eficazmente los dispositivos electrónicos delicados.
- ✓ Diseño sin recubrimiento: Garantiza una excelente destreza y un agarre seguro para un manejo preciso.
- ✓ Comodidad transpirable: Fabricado con materiales ligeros, lo que le mantiene cómodo durante un uso prolongado.
- ✓ Durabilidad y longevidad: Diseñado para resistir el uso repetido sin sacrificar el rendimiento.

Liner	Nylon with carbon filaments
Gauge	13
Sizes Available	S-XL
Bag/Case Qty	10 pairs per bag /300 per case
Colour	White

Del 310

This product is similar to the DEL 300 glove, but it features a white polyurethane coating on the tops of the fingers.

The DEL 310 glove is engineered with advanced carbon fibre technology. It is designed to provide exceptional antistatic properties and enhanced grip, making it the perfect tool for precision-driven tasks in sensitive environments.

Key Features

- ✓ Carbon Fiber Integration: Delivers superior antistatic performance, protecting sensitive components from electrostatic discharge.
- ✓ Finger-Coated Design: Coated fingertips ensure a secure grip without compromising tactile sensitivity or flexibility.
- ✓ Enhanced Durability: Built for extended use, maintaining performance and protection even in demanding conditions.
- ✓ Comfort and Breathability: Lightweight materials provide long-lasting comfort during prolonged wear.

Ce produit est similaire au gant DEL 300, mais il est doté d'un revêtement en polyuréthane blanc sur le dessus des doigts.

Le gant DEL 310 est conçu avec une technologie avancée de fibre de carbone. Il offre des propriétés antistatiques exceptionnelles et une adhérence améliorée, ce qui en fait l'outil idéal pour les tâches de précision dans les environnements sensibles.

Caractéristiques principales

- ✓ Intégration de la fibre de carbone: Offre une performance antistatique supérieure, protégeant les composants sensibles des décharges électrostatiques.
- ✓ Conception avec revêtement des doigts: Le revêtement des doigts assure une prise en main sûre sans compromettre la sensibilité tactile ni la flexibilité.
- ✓ Durabilité accrue: Conçu pour une utilisation prolongée, il maintient les performances et la protection même dans des conditions difficiles.
- ✓ Confort et respirabilité : Les matériaux légers offrent un confort durable en cas de port prolongé.

Este producto es similar al guante DEL 300, pero cuenta con un revestimiento de poliuretano blanco en la parte superior de los dedos.

El guante DEL 310 está diseñado con tecnología avanzada de fibra de carbono. Ofrece excepcionales propiedades antiestáticas y un agarre mejorado, lo que lo convierte en la herramienta perfecta para tareas de precisión en entornos sensibles.

Características clave

- ✓ Integración de fibra de carbono: Ofrece un rendimiento antiestático superior, protegiendo los componentes sensibles de descargas electrostáticas.
- ✓ Diseño con recubrimiento en los dedos: Las puntas de los dedos recubiertas garantizan un agarre seguro sin comprometer la sensibilidad táctil ni la flexibilidad.
- ✓ Mayor durabilidad: Diseñado para un uso prolongado, manteniendo el rendimiento y la protección incluso en condiciones exigentes.
- ✓ Comodidad y transpirabilidad: Los materiales ligeros proporcionan una comodidad duradera durante el uso prolongado.

Coating	PU on fingertips
Material	Nylon with carbon filaments
Gauge	13
Sizes Available	XXS-XXL
Bag/Case Qty	10 pairs per bag /300 per case
Colour	White

Recommended for: ✓ Static electricity protection, Cleanrooms and Circuit boards.

Del 320

This product is similar to the DEL 300 glove but features a white polyurethane coating on the palm.

This glove offers exceptional electrostatic discharge (ESD) protection while providing superior grip and durability, making it the ideal choice for professionals handling sensitive components.

Key Features

- ✓ Carbon Fiber Innovation: Delivers outstanding antistatic properties, effectively neutralising electrostatic buildup.
- ✓ Palm-Coated Design: Ensures a secure, non-slip grip for precise handling and improved productivity.
- ✓ Enhanced Durability: Designed to perform under rigorous conditions without compromising quality.
- ✓ Breathable Comfort: Keeps hands cool and comfortable, even during long hours of use.

Ce produit est similaire au gant DEL 300, mais présente un revêtement en polyuréthane blanc sur la paume.

Ce gant offre une protection exceptionnelle contre les décharges électrostatiques (DES) tout en offrant une adhérence et une durabilité supérieures, ce qui en fait le choix idéal pour les professionnels manipulant des composants sensibles.

Caractéristiques principales

- ✓ Innovation en fibre de carbone: Offre des propriétés antistatiques exceptionnelles, neutralisant efficacement l'accumulation électrostatique.
- ✓ Conception avec revêtement sur la paume: Assure une prise sûre et antidérapante pour une manipulation précise et une productivité accrue.
- ✓ Durabilité accrue: Conçu pour fonctionner dans des conditions rigoureuses sans compromettre la qualité.
- ✓ Confort respirant: Garde les mains fraîches et confortables, même pendant de longues heures d'utilisation.

Este producto es similar al guante DEL 300, pero cuenta con un revestimiento de poliuretano blanco en la palma.

Este guante ofrece una protección excepcional contra descargas electrostáticas (ESD), a la vez que proporciona un agarre y una durabilidad superiores, lo que lo convierte en la opción ideal para profesionales que manipulan componentes sensibles.

Características principales

- ✓ Innovación en fibra de carbono: Ofrece excelentes propiedades antiestáticas, neutralizando eficazmente la acumulación electrostática.
- ✓ Diseño con revestimiento en la palma: Garantiza un agarre seguro y antideslizante para una manipulación precisa y una mayor productividad.
- ✓ Mayor durabilidad: Diseñado para funcionar en condiciones rigurosas sin comprometer la calidad.
- ✓ Comodidad transpirable: Mantiene las manos frescas y cómodas, incluso durante largas horas de uso.

Recommended for: ✓ Indoor, Cleanrooms, ✓ Static electricity protection and ✓ Circuit boards.

Respiratory Protection

Respiratory at Microlin Cooper

Launched in 2017, our respiratory range has continuously expanded. We offer FFP1, FFP2, and FFP3 disposable masks, along with high-quality Type IIR surgical masks. Microlin was among the first to supply these to the UK and Europe during the COVID-19 pandemic, with our FFP3 and surgical masks approved for hospital and first responder use.

FFP masks

FFP3 masks are the most widely used, offering the highest protection (>99% filtration). They protect against dangerous particulates, viruses, and radioactive contamination. All our FFP3 masks meet the EN149:2001 standard, providing APF20 and 50 NPF protection against toxic aerosols as small as 0.3 microns.

Face Fit Testing

Proper face fit is crucial to prevent long-term health risks. A secure seal ensures full protection from hazardous airborne substances. Our FFP3 masks have excelled in face-fit tests, receiving high praise from Fit2Fit accredited testers.

Air & Ultra Ranges

The Air range, our first FFP mask line, was developed for superior face-fit performance and premium quality. The Ultra range offers the same high standards at a lower cost and includes both valved and unvalved FFP2 masks. The Ultra range is our latest range of FFP masks. Similarly to our Air range the ultra masks are made using high quality materials and performs very well on face-fit testing. The key differences between the two ranges are that the ultra range is lower in cost and includes valved and unvalved FFP2 masks.

Air 3000

The Air 3000 is a premium quality FFP3 moulded cupped mask with a valve.

KEY FEATURES:

- Large exhalation valve
- Metal Free
- Inner foam face seal
- Preformed nose bridge - reducing the need for frequent adjustment
- Protection against harmful and toxic substances
- Manufactured using high quality materials
- Adjustable headstraps

APPLICATIONS:

- ✓ Woodworking
- ✓ Weldingwork
- ✓ Cutting and Casting of Metals
- ✓ Hospital
- ✓ Laboratory and Disease Control
- ✓ Textile Work
- ✓ Craft Work
- ✓ Iron and Steel Industry
- ✓ Mining
- ✓ UndergroundCivil
- ✓ Engineering
- ✓ Pharmaceutical Industry
- ✓ Disposal of Toxic Waste
- ✓ Manufacture of Batteries

Certification
EN149:2001 + A1:2009 UKC
Packaging
10 pieces per inner box, 200 pieces per carton.

Air 3000 Carbon

The Air 3000 Carbon is a premium quality FFP3 moulded cupped mask with a carbon filter.

KEY FEATURES:

- Large valve for easy breathing
- Added carbon layer helps filter out nuisance levels of ozone and organic vapours
- Metal free
- 4 adjustable straps for a better face fit
- Full foam inner face seal
- Moulded nose bridge – provides the wearer an easy comfortable fit. There's no metal noseband to adjust, and the seal is maintained with less pressure.

APPLICATIONS:

- ✓ Woodworking
- ✓ Weldingwork
- ✓ Cutting and Casting of Metals
- ✓ Hospital
- ✓ Laboratory and Disease Control
- ✓ Textile Work
- ✓ Craft Work
- ✓ Iron and Steel Industry
- ✓ Mining
- ✓ UndergroundCivil
- ✓ Engineering
- ✓ Pharmaceutical Industry
- ✓ Disposal of Toxic Waste
- ✓ Manufacture of Batteries

Certification
EN149:2001 + A1:2009 UKCA
Packaging
10 pieces per inner box, 200 pieces per carton.

Air Sigma Σ

The Air Sigma is a new disposable FFP3V mask with mesh on the outer part of the mask.

KEY FEATURES:

- Exhalation Valve – reduces moisture and heat inside the mask
- Full face seal
- Fully adjustable head strap enhances excellent fit
- Mesh shell increases shape retention and durability
- Metal-free respirator
- Nose clip-free: pre-formed shape removes need for regular adjustment

APPLICATIONS:

- ✓ Woodworking
- ✓ Weldingwork
- ✓ Cutting and Casting of Metals
- ✓ Hospital
- ✓ Laboratory and Disease Control
- ✓ Textile Work
- ✓ Craft Work
- ✓ Iron and Steel Industry
- ✓ Mining
- ✓ UndergroundCivil
- ✓ Engineering
- ✓ Pharmaceutical Industry
- ✓ Disposal of Toxic Waste
- ✓ Manufacture of Batteries

Certification
EN149:2001 + A1:2009 UKCA
Packaging
10 pieces per inner box, 200 pieces per carton.

Air 3000 Small

The Air 3000 small is a premium quality FFP3 moulded cupped mask offering excellent respiratory protection with optimal fit. The Air 3000 small is a smaller version of our best selling 'KLASS Air 3000' disposable respirator. The Air 3000 small has passed the reusable and dolomite tests certifying it as FFP3 R D.

KEY FEATURES:

- Designed to fit smaller sized faces
- Reusable - suitable for multiple shifts
- Dolomite tested
- 4 point adjustable straps for a superior and more comfortable fit
- 'Klass' signature extra large exhalation valve for even lower breathing resistance
- Metal free
- Full foam inner face seal for added comfort and a better fit
- Preformed nose bridge reducing the need for frequent adjustment

Certification
EN149:2001 + A1:2009 FFP3 R D UKCA
Packaging
10 masks per box, 200 masks per case

Ultra 200

The ultra 200 is a high quality FFP2 mask without a valve. The ultra 200 helps protect the wearer from airborne hazardous contaminants by filtering particles from the inhaled air.

An un-valved respirator gives the protection of both a respirator and a surgical mask.

KEY FEATURES:

- Cup shaped FFP2 mask
- Soft inner foam face seal for added comfort and a more secure face-fit.
- Adjustable straps - helps to provide a more secure feel and provide comfort to face, head and neck.
- Certified EN 149:2001+A1:2009/ UKCA
- Lower cost than valved respirators

APPLICATIONS:

- ✓ Industrial
- ✓ Factories
- ✓ Schools
- ✓ Retail
- ✓ Offices
- ✓ Healthcare

Certification
EN149:2001 + A1:2009 UKCA
Packaging
15 masks per box

Ultra 200V

The ultra 200v is a high quality FFP2 mask with an exhalation valve. The ultra 200V helps protect the wearer from airborne hazardous contaminants by filtering particles from the inhaled air.

The valve makes it easier for the wearer to breathe and prevents heat building up in the mask.

KEY FEATURES:

- Cup shaped FFP2 mask
- Soft inner foam face seal for added comfort and a more secure face-fit.
- Adjustable straps - helps to provide a more secure feel and provide comfort to face, head and neck.
- Exhalation Valve - reduces moisture and heat inside the mask

APPLICATIONS:

- ✓ Pharmaceutical
- ✓ Shipbuilding
- ✓ Chemical processing
- ✓ Construction
- ✓ Metal processing

Certification
EN149:2001 + A1:2009 UKCA
Packaging
15 masks per box

Ultra 300V

The ultra 300v offers the highest level of FFP protection. The added valve makes it easier for the wearer to breathe.

KEY FEATURES:

- High quality exhalation valve - minimises exhalation resistance, moisture and heat are easily expelled.
- Inner foam face seal for better face fit and comfort
- Metal nose clip
- High protection against harmful and toxic substances such as fine dust, smoke and aerosols.
- Manufactured using high quality materials
- Adjustable head-straps - suitable for different head sizes.

APPLICATIONS:

- ✓ Construction
- ✓ Pharmaceutical Manufacturing
- ✓ Metal Working
- ✓ Agricultural Production
- ✓ General Manufacturing
- ✓ Woodworking
- ✓ Chemical Processing
- ✓ Petrochemical
- ✓ Pharmaceuticals

Certification
EN149:2001 + A1:2009 UKCA
Packaging
15 masks per box

NEW

Titan Shield

The impressive Titan Shield offers excellent levels of safety and protection. The lightweight and durable design offers, comfort and style for a range of face sizes.

KEY FEATURES:

- Duel injected temple tips for a secure grip
- Soft temple tips and nose pads for a comfortable fit
- Lens Colour: Clear
- Lightweight
- Stylish
- Polycarbonate wrap around lens
- Anti scratch
- Anti fog

APPLICATIONS:

- ✓ Woodworking
- ✓ Weldingwork
- ✓ Cutting and Casting of Metals
- ✓ Hospital
- ✓ Laboratory and Disease Control
- ✓ Textile Work
- ✓ Craft Work
- ✓ Iron and Steel Industry
- ✓ Mining
- ✓ UndergroundCivil
- ✓ Engineering
- ✓ Pharmaceutical Industry
- ✓ Disposal of Toxic Waste
- ✓ Manufacture of Batteries

Certification

EN166 Optical Class
Class 1 Conforms to EN
166 1 F T

Packaging

10 pieces per inner box,
250 pieces per carton.
